## Queen platform bed frame diy

[Save this plan | Hailey Storage Bedroom Collection 4 – 2x6 @ 8 feet long or 2x2 long at 8 feet long 1 – 4x4 x 10 feet long 1 – 1x2 8 feet long 3 – 1x3 8 feet bed or spring system 2 1/2 pocket hole screws or wood screws 2 finishing nails 2 screws for screwing slats, if used 2 – 2x6 @ 75 2 – 2x6 @57 2 – 2x2 @ 75 1 – 2x4 75 2 – 1x3 @ 79 1 – 1x2 @ 54 1 – 1x3 @54 4 – 2 X4 7 28 - 1x3 @ 27 OR Box spring measuring 54 x 75 max total - slats are cut in half, to maximize the materials on 8" long board Please read the entire plan and all comments before the start of this project. We also recommend that you review the Get Started tab. Take all necessary precautions to build safely and intelligently. Work on a clean flat surface, without imperfections or debris. Always use straight boards. Check for a square after each step. Always drill holes in advance before attaching the screws. Use glue with fine nails for a stronger blacksmith. Wipe excess glue bare wood for stained projects, as dried glue will not stain. Be safe, have fun, and ask for help if you need it. Good luck! Fill all the holes with wood filler and leave to dry. If necessary, apply additional layers of wood filler. When wood filler is completely dry, sand project in the direction of wood grain with 120 grit sandpaper. Vacuum sanded project to remove sanding residues. Remove any sanding of residues and on work surfaces. Wipe a projection with a damp cloth. It is always recommended to apply a test shell over a hidden area or piece of scrap to ensure color uniformity and adhesion. Use a primer or wood balm if necessary. This easy DIY bed platform is the perfect build for beginners! Get the free plans and how-to tutorial in [www.shanty-2-chic.com](http://www.shanty-2-chic.com)! Again, I'm sharing the easy DIY Platform I made for my son ☺ If you missed the free plans for plan boards, you can check them out [HERE!](#) I saw a platform in the West Elm catalogue and loved how up-to-date the base and platform they were, so that was my inspiration and I built it for about \$55!!! [CLICK HERE TO JUMP ON THE FREE PRINTED PLANS](#) It's a very easy piece to build, so it's perfect if you're a beginner! That's how I built it! This plan is for a full-size bed, but it is very easy to adjust the measurements to accommodate another size ☺ I started by making all your cuts for the upper and lower frame. See how to use miter saw video [HERE!](#) Then I drilled all my pocket holes with my Kreg Jig set for 1 1/2 thick boards. (You can find Kreg Jig here on Amazon) and see our Kks for using Kreg Jig video [HERE!](#) I tied the upper frame with screws with a pocket hole 2 1/2 and did the same for the lower frame. Then I turned the top and tied it with screws 2 1/2 pocket holes. I turned it over and attached it with 2 1/2 screws for a pocket hole. You may need to help bring back the bed, bed, Finally, I attached 2x3 cleats with 2 1/2 screws for wood (I call for 2x2 in the plans, because 2x3 are not available in each region. I like to use self-tapping Screws Spax. I find them at Home Depot and they are expensive, but you do not have to break through with them in advance! If you use ordinary screws for wood, first drill in advance to prevent the separation of the tree. To finish, I applied a single-layer rust from a dark brown spot (you can find it [HERE](#) on amazon). If you're buying your deliveries at Home Depot, take the Varathane brand in Dark Walnut (it's the same stain). When the bed was dry, with the hubs we took him inside and into our little man's room! I used my beard to attach 1x3 slats. We just distributed them evenly and attached them to both cleats and the central support. You can use cheap leather strips for this part. Just make sure that they are smooth, so they do not tear your mattress. To attach the headboard to the bed, I drilled 2 1/2 spax screws from the back of the legs of the tray at the bottom and top frames of the platform. I love him so much and I overheard our 11-year-old praising his friends (several times) that his mother built his bed – which is the best part for me ☺ Be sure to check the plans for backgammon [HERE](#) and if you like the color of the wall in his room (I'm obsessed!) you can read about it [HERE!](#) I got a lot of questions about the quilt on my bed, it's from Pottery Barn Teen, but, I bought it a few years ago, so I'm not sure it's still available. Thanks for s stopped by! – Ashley 8 1x3x101 2x8x102 2x8x83 2x6x81 2x4x83 2x2x82 1/2 Pocket holes 2/2 Wood carving Tree GlueFinish choice Assemble the bed upside down. Start with the upper frame. Use glue and screws with a hole of 2 1/2 at each connection. Assemble the lower frame. Make sure that the eyelets on the edge pocket are facing in the same direction. Place the top frame on the floor with the pocket holes facing upwards and place the bottom frame on top. Fasten them together with screws for pocket holes. Attach 2x2 cleats to the sides and the central 2x4 support in the middle. 2x2 screw into the bed frame with wood screws, and 2x4 support is fastened with screws for pocket holes from each end. All three parts should be 3/4 lower than the top of the upper frame. Add your slats and the construction is done! Now, all you need to do is sand and finish as you wish and enjoy your new bed platform. This perforatolo was made for a previous version, which I also did. Search our website Plunkett Board to see it. As always, if you decide to make this bed, be sure to share it on social media and use #shanty2chic photos so we can share it too! Facebook Twitter Ana White This rustic modern bed plan will show you how to build which is built entirely of 2x6 boards. This bed is low to the ground, making it great for a small space or stylish stylish You'll find a list of stores, a list of tools, guide building, and diagrams to help you build it. Rustic Modern 2x6 Platform Bed by Ana White This gives me both sides, the backgammon and the bottom. I also cut an additional board, which will be the central support. If you want to build this platform on the bed yourself, I have a set of plans related above, which includes a list of materials and a list of cutting. Then I took the boards to my table saw and cut them in width. It also took down the rounded edge that a 2x board usually has. You can also do this with a circular saw and a straight edge. Home House & components bedroom rooms There is interest in building your own bed frame DIY platform? These bed platforms range from ultra-easy to innovative, so check out who works best for you. 1/10 A platform bed sounds even better with options for storing blankets, books and other accessories. Check out this DIY platform bed with memory cubbyholes. This DIY high bed platform is quite a complex project, so keep in mind that it will take some time and circular saw. Photo: Courtesy of Lowes 2/10 Looking for a small bed project fit for a child or two? These plans show you how to build a simple toddler DIY bed platform, which are padded with fabric for extra protection and ideal for small children's rooms. The padding of fabric takes a little longer, but otherwise it is easy to make a bed frame yourself. Photo: Courtesy of Design Mom 3/10 Do you want a classic DIY simple wooden frame platform bed frame with sturdy legs and traditional slat mattress support? Try this model, which has easy instructions and leaves a lot of room to choose the type of wood and stain to match your bedroom. Photo: Courtesy of Shanti-2-Chic 4/10 Not a fan of bed legs (tired of losing items under)? This beautiful DIY bed platform is made of basic 2x6 timber - and no bedding legs, giving you a shaven-hearted look that combines rustic and modern styles. Photo: Courtesy of Ana White 5/10 Looking for your high-rise single platform bed with simple slats that you can make in your yard over the weekend? This project will give you exactly what you are looking for if you want an ordinary frame with a large bed of extra height (perhaps for more storage options). Note that depending on the setting of your needs, the edges may need additional frame or protection. Photo: Courtesy of an instructive 6/10 A DIY platform bed can be made from reclaimed wood. It's perfect if you have old boards (wider is better) or other boards that you would like to use for good. Photo: Courtesy of Mr Kate 7/10 Are you interested in an extremely sturdy frame for a bed with a platform that can gain a lot of weight and last for years? See these plans: They require wooden legs and adding additional support around the diy bed frame, which will continue. Plus, the estimated cost is about \$ 30. Here are some ideas if you want to make backgammon. Photo: Courtesy of Wood House 8/10 Crazy for Pallets? This This based on one of 17 different styles in this collection. You may need to do a fairer bit of recovery to get particularly rough pallets in shape, but this is still one of the easiest projects, and comes with many options, including some with lighting under the bed and storage. Photo: Courtesy of Made 4 Decor 9/10 This very solid and beautiful bed frame is perfect for a farm-style bedroom. This is a great project for those who have some woodworking and installation experience, and want to make your own platform frame that seems to have come from an expensive furniture store. This means additional work and materials, but the result is well worth it! Photo: Courtesy of A City Born Love 10/10 This floating bed has hidden legs that make the frame look like floating over the floor. It's a striking effect, easy to create and ideal for modern bedrooms. This DIY bed frame also features a unique built-in bedside table/hidden storage space.
